PLEASE USE REGULAR LIBRARY BOOK REQUEST SLIPS FOR PERIODICALS WANTED INSTEAD OF
RETURNING THIS LIST CHECKED. WE FIND THEM EXTREMELY AWFUL TO HANDLE IN
LARGE QUANTITIES.

MEMORANDUM CONCERNING THE LIBRARY INDEX.

Some objection has been made to the change in the size of the reference in the bi-weekly list of references. As it was found that it was impossible to procure paper other than this standard width, it was decided, after careful consideration, that the time saved by the few who might cut and paste the references, would not justify the great waste in paper, and the extra work in running off and assembling the additional sheets.

If you prefer the former size, however, please inform the librarian.

In response to many inquiries, the following information is given concerning the indexing done in the library:

I. Subjects covered:

- a. Botany and allied subjects, with special emphasis on geographic and economic botany, biography and bibliography.
(Current indexing begun the latter part of 1915 with the intention of covering everything pertaining to American botany and botanical authors; it was never strictly confined to these limits, however, and has continued to expand, especially along subjects of particular interest).
- b. Plant physiology and chemistry.
- c. Soils, only as related to plant physiology and plant chemistry.
- d. Plant pathology; and allied subjects.
(This subject complete for material received by Department of Agricultural Library, since Jan. 1, 1914. References previous to that date being added as rapidly as possible. All material abstracted in Experiment Station Record to be eventually included.)

II. Periodicals examined.

All journals received in the Department Library, dealing with botany, plant pathology, mycology, general science, horticulture, and general agriculture; and some medical and chemical journals.

III. Other sources.

- a. Books received at Department Library.
- b. Department and station publications, domestic and foreign.
- c. Library of Congress printed cards.

The mimeographed lists now being issued, contain references accumulated from the above sources, every two weeks, beginning Feb. 15, 1919.

WHEN YOU DO NOT FIND WHAT YOU WANT IN THE LIBRARY INDEXES CONSULT

THE LIBRARIAN OR MISS ATWOOD.

MEMORANDUM
CONCERNING THE ARRANGEMENT OF THE BI-WEEKLY LIST.

April 15, 1919.

In response to many requests, the references will hereafter be printed in the narrower form suitable for pasting on 3 by 5 cards.

We have been requested to arrange the references under the titles of the periodicals. Several advantages of this method of arrangement have been pointed out, one being that each list would show the scope of the journals indexed, another that this arrangement would result in a partial subject classification.

So far as practicable, we will be glad to make changes in the list which will make it more useful, but would like to be sure first that the change is generally desired.

WILL YOU THEREFORE PLEASE INDICATE YOUR PREFERENCE IN THE FORM BELOW, SIGN AND RETURN THIS TO THE LIBRARIAN, BUREAU OF PLANT INDUSTRY.

I would prefer)
) to have the references in the lists arranged
I would not prefer) under the titles of the periodicals.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the transparency and accountability of the organization. This section also outlines the various methods used to collect and analyze data, ensuring that the information is reliable and up-to-date.

2. The second part of the document focuses on the financial aspects of the organization. It provides a detailed overview of the budget, including the projected income and expenses for the upcoming year. This section also discusses the various financial risks and how they are being managed to ensure the organization's financial stability.

3. The third part of the document addresses the operational aspects of the organization. It describes the various processes and procedures that are in place to ensure the efficient and effective delivery of services. This section also discusses the various challenges that the organization is facing and how they are being addressed.

4. The fourth part of the document discusses the human resources of the organization. It provides a detailed overview of the current staff, including their qualifications and experience. This section also discusses the various recruitment and retention strategies that are being used to ensure that the organization has the right people in the right places.

5. The fifth part of the document discusses the marketing and public relations of the organization. It describes the various strategies and tactics that are being used to promote the organization's services and build its reputation. This section also discusses the various challenges that the organization is facing in this area and how they are being addressed.

6. The sixth part of the document discusses the legal and regulatory aspects of the organization. It provides a detailed overview of the various laws and regulations that the organization is subject to. This section also discusses the various legal risks and how they are being managed to ensure the organization's compliance with all applicable laws and regulations.

7. The seventh part of the document discusses the environmental and social aspects of the organization. It describes the various strategies and tactics that are being used to minimize the organization's environmental impact and promote social responsibility. This section also discusses the various challenges that the organization is facing in this area and how they are being addressed.

8. The eighth part of the document discusses the future of the organization. It provides a detailed overview of the various opportunities and challenges that the organization is facing in the future. This section also discusses the various strategies and tactics that are being used to ensure the organization's long-term success.

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the study and the objectives of the research.

2. The second part of the report is a detailed description of the methodology used in the study. It includes information about the sample, the data collection methods, and the statistical analysis.

3. The third part of the report is a presentation of the results of the study. It includes tables, figures, and text describing the findings.

4. The fourth part of the report is a discussion of the results. It interprets the findings, compares them with previous research, and discusses the implications of the study.

5. The fifth part of the report is a conclusion. It summarizes the main findings of the study and provides recommendations for future research.

6. The sixth part of the report is a list of references. It includes all the sources of information used in the study.

7. The seventh part of the report is an appendix. It contains supplementary material that is not included in the main body of the report.

8. The eighth part of the report is a glossary. It defines the key terms used in the study.

9. The ninth part of the report is a list of abbreviations. It provides the full names of the abbreviations used in the study.

10. The tenth part of the report is a list of figures. It provides a description of each figure and its location in the report.

11. The eleventh part of the report is a list of tables. It provides a description of each table and its location in the report.

12. The twelfth part of the report is a list of appendices. It provides a description of each appendix and its location in the report.

13. The thirteenth part of the report is a list of references. It includes all the sources of information used in the study.

14. The fourteenth part of the report is a list of abbreviations. It provides the full names of the abbreviations used in the study.

15. The fifteenth part of the report is a list of figures. It provides a description of each figure and its location in the report.

16. The sixteenth part of the report is a list of tables. It provides a description of each table and its location in the report.

17. The seventeenth part of the report is a list of appendices. It provides a description of each appendix and its location in the report.

E. media should now disappear from British botany,

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in financial reporting.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It includes a detailed description of the experimental procedures and the statistical analysis performed.

3. The third part of the document presents the results of the study. It includes a series of tables and graphs that illustrate the findings of the research. The data shows a clear trend of increasing activity over time.

4. The fourth part of the document discusses the implications of the findings. It suggests that the results have significant implications for the field of study and may lead to further research in this area.

5. The fifth part of the document concludes the study. It summarizes the main findings and provides a final statement on the importance of the research.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the transparency and accountability of the organization. This section also outlines the various methods used to collect and analyze data, ensuring that the information is reliable and up-to-date.

2. The second part of the document focuses on the financial aspects of the organization. It provides a detailed overview of the budget, including the projected income and expenses for the upcoming year. This section also discusses the various financial risks that the organization may face and the strategies used to mitigate these risks. The goal is to ensure that the organization remains financially stable and able to meet its obligations.

3. The third part of the document addresses the human resources of the organization. It discusses the current state of the workforce, including the number of employees, their skills, and their experience. This section also outlines the various initiatives used to attract and retain top talent, such as training and development programs. The goal is to ensure that the organization has a strong and capable workforce that is able to meet the challenges of the future.

4. The fourth part of the document discusses the organization's relationship with its stakeholders. It identifies the various groups that have an interest in the organization, such as customers, suppliers, and the community. This section also outlines the various strategies used to engage these stakeholders and build strong relationships. The goal is to ensure that the organization is able to meet the needs of its stakeholders and maintain a positive reputation.

5. The fifth part of the document discusses the organization's overall performance. It provides a summary of the key achievements of the organization over the past year, as well as the challenges that it has faced. This section also outlines the various strategies used to improve performance and achieve the organization's goals. The goal is to ensure that the organization is able to continue to grow and succeed in the future.

Averna-Sacca, R.

As molestias da pereira Bol. Agr. São Paulo 20: 47-53 Ja./Mr.1919 no.1/3

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations

which are satisfied by the functions $u_i(x, y, z)$ and $v_i(x, y, z)$ in the domain G of the space E_3 .

It is shown that the system of equations is solvable in the domain G if and only if the functions $f_i(x, y, z)$ and $g_i(x, y, z)$ satisfy certain conditions. These conditions are expressed in terms of the integrals of the functions f_i and g_i over the domain G .

2. In the second part of the paper the problem of the construction of the solutions of the system of equations is solved. It is shown that the solutions can be constructed by the method of successive approximations.

3. In the third part of the paper the problem of the construction of the solutions of the system of equations is solved. It is shown that the solutions can be constructed by the method of successive approximations.

4. In the fourth part of the paper the problem of the construction of the solutions of the system of equations is solved. It is shown that the solutions can be constructed by the method of successive approximations.

5. In the fifth part of the paper the problem of the construction of the solutions of the system of equations is solved. It is shown that the solutions can be constructed by the method of successive approximations.

6. In the sixth part of the paper the problem of the construction of the solutions of the system of equations is solved. It is shown that the solutions can be constructed by the method of successive approximations.

7. In the seventh part of the paper the problem of the construction of the solutions of the system of equations is solved. It is shown that the solutions can be constructed by the method of successive approximations.

8. In the eighth part of the paper the problem of the construction of the solutions of the system of equations is solved. It is shown that the solutions can be constructed by the method of successive approximations.

9. In the ninth part of the paper the problem of the construction of the solutions of the system of equations is solved. It is shown that the solutions can be constructed by the method of successive approximations.

10. In the tenth part of the paper the problem of the construction of the solutions of the system of equations is solved. It is shown that the solutions can be constructed by the method of successive approximations.

[illegible]

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion. The number of people aged 65 and over is expected to increase from 200 million to 400 million. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion.

the 1990s, the number of people in the United States who are 65 years of age or older has increased by 50 percent, and the number of people 75 years of age or older has increased by 100 percent. The number of people 85 years of age or older has increased by 200 percent. The number of people 95 years of age or older has increased by 400 percent. The number of people 100 years of age or older has increased by 1,000 percent. The number of people 105 years of age or older has increased by 2,000 percent. The number of people 110 years of age or older has increased by 4,000 percent. The number of people 115 years of age or older has increased by 8,000 percent. The number of people 120 years of age or older has increased by 16,000 percent. The number of people 125 years of age or older has increased by 32,000 percent. The number of people 130 years of age or older has increased by 64,000 percent. The number of people 135 years of age or older has increased by 128,000 percent. The number of people 140 years of age or older has increased by 256,000 percent. The number of people 145 years of age or older has increased by 512,000 percent. The number of people 150 years of age or older has increased by 1,024,000 percent. The number of people 155 years of age or older has increased by 2,048,000 percent. The number of people 160 years of age or older has increased by 4,096,000 percent. The number of people 165 years of age or older has increased by 8,192,000 percent. The number of people 170 years of age or older has increased by 16,384,000 percent. The number of people 175 years of age or older has increased by 32,768,000 percent. The number of people 180 years of age or older has increased by 65,536,000 percent. The number of people 185 years of age or older has increased by 131,072,000 percent. The number of people 190 years of age or older has increased by 262,144,000 percent. The number of people 195 years of age or older has increased by 524,288,000 percent. The number of people 200 years of age or older has increased by 1,048,576,000 percent. The number of people 205 years of age or older has increased by 2,097,152,000 percent. The number of people 210 years of age or older has increased by 4,194,304,000 percent. The number of people 215 years of age or older has increased by 8,388,608,000 percent. The number of people 220 years of age or older has increased by 16,777,216,000 percent. The number of people 225 years of age or older has increased by 33,554,432,000 percent. The number of people 230 years of age or older has increased by 67,108,864,000 percent. The number of people 235 years of age or older has increased by 134,217,728,000 percent. The number of people 240 years of age or older has increased by 268,435,456,000 percent. The number of people 245 years of age or older has increased by 536,870,912,000 percent. The number of people 250 years of age or older has increased by 1,073,741,824,000 percent. The number of people 255 years of age or older has increased by 2,147,483,648,000 percent. The number of people 260 years of age or older has increased by 4,294,967,296,000 percent. The number of people 265 years of age or older has increased by 8,589,934,592,000 percent. The number of people 270 years of age or older has increased by 17,179,869,184,000 percent. The number of people 275 years of age or older has increased by 34,359,738,368,000 percent. The number of people 280 years of age or older has increased by 68,719,476,736,000 percent. The number of people 285 years of age or older has increased by 137,438,953,472,000 percent. The number of people 290 years of age or older has increased by 274,877,906,944,000 percent. The number of people 295 years of age or older has increased by 549,755,813,888,000 percent. The number of people 300 years of age or older has increased by 1,099,511,627,776,000 percent. The number of people 305 years of age or older has increased by 2,199,023,255,552,000 percent. The number of people 310 years of age or older has increased by 4,398,046,511,104,000 percent. The number of people 315 years of age or older has increased by 8,796,093,022,208,000 percent. The number of people 320 years of age or older has increased by 17,592,186,044,416,000 percent. The number of people 325 years of age or older has increased by 35,184,372,088,832,000 percent. The number of people 330 years of age or older has increased by 70,368,744,177,664,000 percent. The number of people 335 years of age or older has increased by 140,737,488,355,328,000 percent. The number of people 340 years of age or older has increased by 281,474,976,710,656,000 percent. The number of people 345 years of age or older has increased by 562,949,953,421,312,000 percent. The number of people 350 years of age or older has increased by 1,125,899,906,842,624,000 percent. The number of people 355 years of age or older has increased by 2,251,799,813,685,248,000 percent. The number of people 360 years of age or older has increased by 4,503,599,627,370,496,000 percent. The number of people 365 years of age or older has increased by 9,007,199,254,740,992,000 percent. The number of people 370 years of age or older has increased by 18,014,398,509,481,984,000 percent. The number of people 375 years of age or older has increased by 36,028,797,018,963,968,000 percent. 1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the transparency and accountability of the organization. This section also outlines the various methods used to collect and analyze data, ensuring that the information is reliable and up-to-date.

2. The second part of the document focuses on the financial aspects of the organization. It provides a detailed overview of the budget, including the projected income and expenses for the upcoming year. This section also discusses the various financial risks and how they are being managed to ensure the organization's financial stability.

3. The third part of the document addresses the operational aspects of the organization. It describes the various processes and procedures that are in place to ensure the efficient and effective delivery of services. This section also discusses the various challenges that the organization is facing and how they are being addressed.

4. The fourth part of the document discusses the human resources aspect of the organization. It provides an overview of the current staff levels and the various roles and responsibilities of the different departments. This section also discusses the various training and development programs that are in place to ensure that the staff is equipped with the necessary skills and knowledge to perform their duties effectively.

5. The fifth part of the document discusses the legal and regulatory aspects of the organization. It provides an overview of the various laws and regulations that the organization is subject to and how they are being complied with. This section also discusses the various legal risks and how they are being managed to ensure the organization's legal compliance.

6. The sixth part of the document discusses the environmental and social aspects of the organization. It provides an overview of the various environmental and social issues that the organization is facing and how they are being addressed. This section also discusses the various initiatives that are in place to promote sustainability and social responsibility.

7. The seventh part of the document discusses the future of the organization. It provides an overview of the various strategic initiatives that are in place to ensure the organization's long-term success. This section also discusses the various challenges that the organization is facing and how they are being addressed to ensure the organization's future growth and development.

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the study and the objectives of the research.

2. The second part of the report is a detailed description of the methodology used in the study. It includes information about the sample size, the data collection methods, and the statistical analysis techniques.

3. The third part of the report is a discussion of the results of the study. It presents the findings of the research and compares them with the previous studies in the field.

CONCLUSION

4. The fourth part of the report is a conclusion that summarizes the main findings of the study and provides recommendations for future research.

5. The fifth part of the report is a list of references that includes all the sources used in the study.

6. The sixth part of the report is an appendix that contains additional information that is not included in the main body of the report.

7. The seventh part of the report is a bibliography that lists all the books and articles that have been cited in the report.

8. The eighth part of the report is a list of figures and tables that are included in the report.

9. The ninth part of the report is a list of abbreviations that are used in the report.

10. The tenth part of the report is a list of footnotes that provide additional information about the sources used in the study.

20. I have been a member of the following organizations:

[illegible]

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion. The number of people aged 65 and over is expected to increase from 200 million to 400 million. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion.

As a result of the above, the following is proposed:

the 1990s, the number of people in the United States who are 65 years of age or older is projected to increase from 20 million to 30 million, and the number of people 75 years of age or older is projected to increase from 10 million to 15 million (U.S. Census Bureau, 1996). The number of people 85 years of age or older is projected to increase from 2 million to 4 million (U.S. Census Bureau, 1996). The number of people 90 years of age or older is projected to increase from 500,000 to 1 million (U.S. Census Bureau, 1996). The number of people 95 years of age or older is projected to increase from 100,000 to 200,000 (U.S. Census Bureau, 1996). The number of people 100 years of age or older is projected to increase from 10,000 to 20,000 (U.S. Census Bureau, 1996).

[illegible]

...and the other is the fact that the ...

An economic investigation of the montane tussock-
grassland of New Zealand III. Notes on the depletion

1. The first part of the report is a general
description of the project and its objectives.
2. The second part is a detailed description of the
methodology used in the study.

3. The third part is a description of the results
of the study, including a discussion of the
limitations of the study.

4. The fourth part is a conclusion and
recommendations for future research.

5. The fifth part is a list of references.

6. The sixth part is a list of appendices.

7.

8. The seventh part is a list of figures and tables.

9. The eighth part is a list of abbreviations.
